

ISHITA GUPTA

DevOps and DevSecOps Engineer — Azure | Terraform | CI/CD | Linux

+91-9897795353 | ishitagupta605@gmail.com | [linkedin.com/in/ishita-gupta-devops](https://www.linkedin.com/in/ishita-gupta-devops) | github.com/ixhita12

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience managing Microsoft Azure cloud infrastructure, including Linux-based virtual machines and containerized workloads. Skilled in designing IaC solutions using Terraform, building CI/CD pipelines (Azure DevOps, Jenkins, GitHub Actions), and orchestrating applications with Docker and Kubernetes. Experienced in proactive monitoring and incident management (Prometheus, Grafana, CloudWatch) and integrating code quality tools like SonarQube. Proactive, methodical problem-solver with strong communication skills, eager to contribute to a 24/7 production support model.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (VMs, Azure CLI, Azure DevOps, AKS, Resource Groups); AWS (EC2, IAM, VPC, S3, CloudWatch, ELB, AMI)

IaC & Automation: Terraform (init/plan/apply/destroy), PowerShell scripting, Bash/Shell scripting, Ansible (basics)

CI/CD & Containers: Jenkins, Azure DevOps, GitHub Actions, Docker, Docker Compose, Kubernetes, AKS

DevSecOps & Code Quality: SonarQube (static code analysis)

Monitoring & Ops: Azure Monitor, Prometheus, Grafana, CloudWatch, Incident Management, Alerting

Programming & DB: Python, Java, SQL, MySQL, PostgreSQL, MS SQL Server (basics), REST APIs, JSON, YAML

Version Control & Tools: Git, GitHub, Jira, SSH, PuTTY, Linux (Ubuntu)

PROFESSIONAL EXPERIENCE

DevOps Engineer (Intern) — DevOps Insiders

Apr 2025 – Present

- Provisioned and administered Linux-based virtual machines on Microsoft Azure to support application infrastructure.
- Designed and maintained Infrastructure as Code (IaC) solutions using Terraform for automated, repeatable resource provisioning.
- Built and optimized CI/CD pipelines using Azure DevOps, Jenkins, and GitHub Actions for automated build, test, and deployment workflows.
- Deployed and managed containerized applications using Docker and Kubernetes for scalable orchestration.
- Integrated SonarQube into CI pipelines for static code analysis and code quality enforcement.
- Automated operational tasks using Azure CLI and PowerShell scripts to reduce manual effort.
- Configured Prometheus, Grafana, and Grafana Loki for proactive monitoring, alerting, and incident management.
- Gained exposure to MS SQL Server environments, backup/recovery validation, and Azure cost optimization practices.

PROJECTS

IaC with Terraform & Docker

- Designed Terraform configuration files to provision cloud infrastructure using Infrastructure as Code principles.
- Used Terraform workflow (init → plan → apply → destroy) to automate creation and teardown of a Dockerized Nginx server, ensuring repeatable and consistent deployments.
- Reduced manual setup time and eliminated configuration drift by codifying infrastructure.

Jenkins CI/CD Pipeline

- Built a Jenkins Declarative Pipeline to automate the build, test, and deployment process for an application.
- Integrated GitHub for source control and Docker for containerized deployment, enabling continuous delivery on every code push.
- Streamlined the release process, reducing manual deployment effort and deployment errors.

EC2 Web Server Deployment

- Deployed a static website on an AWS EC2 instance, configuring the server environment for hosting.
- Set up Security Groups and SSH-based access controls to secure the instance and manage remote administration.
- Ensured secure, reliable public access to the hosted site while following basic cloud security practices.

EDUCATION

Master of Computer Applications (MCA) — INMANTEC Institutions (AKTU) | 2024 – 2026

Bachelor of Computer Applications (BCA) — Gautam Buddha University | 2021 – 2024
